**November 3, 2023:** Man Fire riverbed area. This area was essentially burned to the ground and yet short months later have become an impassable jungle of highly flammable material.

**November 4, 2023:** Towers and lines surrounded by growth and a nearly impassable service road.

View from NW Norco Bluffs. Foliage is literally impassable other than very narrow horse trails. The terrain is difficult to navigate and is ever changing with small ponds and even quicksand presenting obstacles to fighting fires.
